# Product Descriptions

## 100 Words

Increase productivity, accuracy, and coordination—from conceptual design through construction documentation—with Autodesk® Building Systems 2007, AutoCAD®-based software for mechanical/electrical/plumbing (MEP) engineers, designers, and drafters. Maximize the efficiency of your AutoCAD-based engineering workflow with an intuitive design environment. Collaborate seamlessly with architects using AutoCAD-based software applications. Automate production of construction documents using enhanced single-line and double-line system design and layout productivity tools. And minimize documentation coordination errors between mechanical, electrical, and plumbing engineering design teams as well as with architects and structural engineers. Autodesk Building Systems: A better, faster AutoCAD for MEP engineering, building design, and documentation.
